

"Purple" zircon-copper

15.2

	#1 (C)	#2 (D)	#3 (B)
Silica	26		26
Kaolin (EPK)	5	12	5
Potash Feldspace (Cluster)	25		25
Whiting	10		10
Gerstley Borate (Laguna)	18		18
Talc	9		9
Zirconium (Zircopax)	10	10	
Copper Carbonate			2

Notes:

The low EPK version is in the lower left. This test tile had the nicest finish.

There was some micro pinholes in the high-alumina (EPK) copper tests.

The addition of a small amount of copper creates a rather nice cerelean blue. Try between 0.3 and 0.7.

The progress to a better white glaze will continue from recipe version #1.
